02 EMPLOYMENT HISTORY

04/2020 — Present	Software Engineer III at JP Morgan Chase & Co <i>Bengaluru</i>
Long term goals - Retirement/Home/Education etc., Currently working in JPWM integrating several features related to long term goals and wealth plan. Developing reusable iOS swift packages (UI and functionality) which can be consumed by the organization applications. more: https://www.chase.com/personal/investments/wealth-plan Digital mobile frameworks - Base components for all the apps through out the firm These core components like Network/Platform/Configuration/Logging/Analytics/Navigation etc., are included in this. Our job is to keep on creating more and more reusable features and updating the existing code to meet the new requirements. All the components are made as Swift packages so that the apps can integrate through the Apple's SPM way.	
09/2017 — 03/2020	Software Engineer II at JP Morgan Chase & Co <i>Bengaluru</i>
Tim corners vineyard - a wine shopping cart Developed an iPhone application from scratch to showcase how small scale businesses can enable and take advantage of chase pay in their own apps. Apart from UI chase pay SDK was developed so that the other apps can integrate that in to their apps and give their users the option	

to pay via chase. Themes is a exciting feature in this app so that up on selection in settings whole app theme was changed according to the particular industry. we supported 4 themes in this app.

Flow/Snap shot - an iOS component

Flow is a new module that was developed and integrated into the existing chase retail app. The purpose of this was to retain the existing customers by showing them some insights about their money. Insights include daily/weekly/monthly spent and savings/streak/rewards/what's new/safe2invest and some other insights which attracts and excite the users. Used core plot to show the scatter plot,bar graphs,confetti animations and very attractive UI components for the insights. Also converting the code in to shared frameworks so that they can be used across the organization.

03/2016 — 08/2017

Senior iOS Developer at Arowana Consulting

Bengaluru

Developed iPad based hospitality applications for several hotels. The customer who checks in to the hotel can know the details, events, food items and almost all the things related to the hotel from the app itself. Ambiance/Entertainment modules are the fascinating features in this app where customer can also control the electronics like A/C, TV, Curtains, Lights etc., and can watch/play/pause/select/change movies/music/channels from the application itself. KNX protocol was used to communicate with the RCU by making HTTP requests.

02/2009 — 03/2016

Senior Software Engineer at WebToGo

Visakhapatnam

Creating and deploying internet connection kits (Sim/WiFi) for different network operators. The solutions include Windows/MAC desktop applications and network diagnostic solutions in Mobile. Some of the clients were Orange, H3GA, Avea, Telkomsel etc., This Software is a connection manager(CM) which supports MOBILE,LAN,WIMAX and WIFI connections. These CM's has several modules like SMS/thresholds/Data routing between mobile/WiFi. Along with this developed installers and uninstallers which installs the software from the flash devices. (Ex: Dongles)
